

## Chile Energy Storage Project Planning

Energy storage is a challenge and an opportunity. Having launched a national storage strategy in that sets targets and aims to attract investment in the sector, and with a large pipeline of projects on the way, Chile's installed storage capacity could soon be significantly increased. Chile energy storage: Impressive Goal Achieved. The central and northern regions of Chile will be the engine of this growth, with plans for 3,000 MW and 6,000 MW of energy storage capacity, respectively. These regions are seeing large scale battery storage on the rise in Chile. Three utility scale battery energy storage projects co-located with solar plants were announced last week in Chile. Enel is building a 67 MW/134 MWh battery, while CJR Renewable and Uriel Chile Energy Storage Chile will need new renewable energy storage systems to replace its current backup capacity of coal-fired plants and natural gas-powered combined cycle turbines and Chile To Deploy 5 GW Of Battery Storage Capacity By To To address these issues, two major developments are planned -- the large-scale deployment of battery storage and the construction of the 3 GW Kimal-Lo Aguirre Chile Energy Storage Project Tender Announcement: What You If you're in the energy storage game, Chile's tender announcement is like spotting a rare bird in the Atacama Desert--exciting and packed with potential. Chile maps out 85 energy storage projects. The number of ongoing and planned energy storage projects in Chile reached 85 by August, with their capacity totaling 6.4 gigawatts (GW), PV Magazine reports. Chile Already Halfway to 2 GW Energy Storage Target. By the end of March, the country had 954 MW of operational energy storage capacity, representing 48% of its national target of 2 GW by . This progress highlights Chile makes progress on energy storage with 20+ approved projects. The technological diversity of energy storage projects in Chile is remarkable. From battery storage systems to innovative projects with gases such as CO<sub>2</sub>, the country is exploring different options. Energy storage is a challenge and an opportunity for Chile. Having launched a national storage strategy in that sets targets and aims to attract investment in the sector, and with a large pipeline of projects on the way, Chile's installed storage capacity could soon be significantly increased. Large scale battery storage on the rise in Chile. Three utility scale battery energy storage projects co-located with solar plants were announced last week in Chile.
