

Double glass module bipv

Revolutionize Energy with BIPV Solar Modules for Buildings

Novergy offers three types of BIPV solar modules: Double Glass PV panels, See-Through PV Glass series, and PV Colorshine (opaque) series. These panels are available in various sizes and colors. Do BIPV solar panels support double-glass design? Although double-glass BIPV modules have a slightly higher initial investment, their long life, low maintenance, excellent weather resistance and environmental protection advantages make them a great choice for building facades, windows, roof glazing, etc. with a high degree of transparency or full spandrel PV elements, PV/Thermal 85W CdTe Thin Film, BIPV Double Glass Module. Highest performing thin film modules in the industry for over 10 years, with +12% efficiency. Thin film modules are not adversely affected by partial shade and outperform crystalline modules.

Double Glass Transparent Module, Double Glass Bifacial Module

Our products, such as Double Glass Transparent Module, Double Glass Bifacial Module, break through the limits of traditional solar modules, to deliver high-performance, safe, and efficiency-enhanced PV products, Building BiPV Modules (Solar Photovoltaic Technology). The glass appears to be opaque when looking at the building, but it's actually transparent and can function as windows. Our easily installable BiPV modules produce the same amount of energy or more than traditional solar modules.

Microquanta developing perovskite solar modules. These double-glazed modules achieve a light transmittance of around 40%, allowing ample daylight into the building interior while generating electricity. Ensuring durability and waterproofing.

BIPV-DOUBLE GLASS

Double glass modules use double sided low iron tempered glass with solar cells laminated in between. Double glass modules are ideal for roofs, skylights and/or facades. Double glass modules are customized bifacial double glass transparent solar PV modules with 5%-70% transmittance, which is specially designed photovoltaic panels for applications like Building-integrated Photovoltaics.
