

Energy Storage Project Orders

What does the energy storage order mean for NYSERDA? The Energy Storage Order established a statewide goal of deploying 3,000 MW of new bulk energy storage by and required that NYSERDA submit a draft Implementation Plan that outlines the methods and budget that could be used to achieve the bulk energy storage deployment target. When will bulk energy storage be available in New York State? Categories: Renewable Energy Credits , Energy Policy , State Implementation Plans , Energy Storage , Batteries New York State continues to advance its bulk energy storage deployment efforts, and a final Bulk Storage Implementation Plan is now likely to be made public before the end of April--with procurements set to begin by June 30, . What is the energy storage order (ISC)? The Energy Storage Order adopted the ISC mechanism described in the Roadmap to help drive investment in bulk energy storage resources. The ISC represents 1 MWh of energy storage capacity that is operational and available on a given day, with units considered either available or unavailable for the entire day. Why did the PSC approve energy storage programs in ? The PSC's subsequent Energy Storage Order approved the energy storage programs described in the Roadmap in order to achieve a total of 4,700 megawatts ("MWs") of incremental installed capacity of energy storage spanning the bulk, retail, and residential sectors. How long has the PSC been working on an energy storage plan? Efforts towards a finalized implementation plan have been ongoing since June , when Governor Hochul first announced that the PSC had approved an Energy Storage Roadmap in furtherance of the state's goal to achieve six gigawatts ("GWs") of energy storage by . How many GW of storage will the PSC order entail? The PSC order targets 3 GW of new utility-scale storage, 1.5 GW of new retail storage and 200 MW of new residential storage in addition to the 1.3 GW of storage assets already deployed in the state. 6 GW 3,000 MW of wholesale Highlights of the Order include: New York State's energy storage target is set at 6 GW (6,000 MW) by , expanding on the existing Climate Act goal of 3 GW by . Bulk Energy Storage Procurements and Road Map The Order, issued June , establishes new and expanded programs to help the State meet the 6GW goal, with the bulk of new storage procured via NYSERDA New York's Bulk Energy Storage Procurements to New York State continues to advance its bulk energy storage deployment efforts, and a final Bulk Storage Implementation Plan is now likely to be made public before the end of April--with procurements set to ENERGY STORAGE PROJECTS Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, energy storage will play a key role PSC Approves NYSERDA's Bulk Energy Storage Program The Energy Storage Order established a statewide goal of deploying 3,000 MW of new bulk energy storage by and required that NYSERDA submit a draft New York PSC adopts energy storage road map Hochul announced plans in January to double New York's previous energy storage goal of 3 GW by . The state released a draft road map in December showing how it would achieve its The most energy storage projects and orders in the world The project is expected to start delivery in and be connected to the grid at full capacity in . Since then, the throne of this record has changed hands several times, with New York PSC Approves NYSERDA's Billion The

Energy Storage Project Orders

PSC's prior Order Establishing Updated Energy Storage Goals and Deployment Policy 4 required NYSERDA to issue its first competitive solicitation for bulk storage through a request for proposals Major Solar Projects List - SEIA October 29, Map Major Solar Projects Major Solar Projects List highlights Quick Facts There are more than 8,100 major solar projects currently in the database, representing over 340 Battery Energy Storage Systems: Main Considerations for Safe This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems (challenges & fires), BESS 6 GW 3,000 MW of wholesale Highlights of the Order include: New York State's energy storage target is set at 6 GW (6,000 MW) by , expanding on the existing Climate Act goal of 3 GW by . New York's Bulk Energy Storage Procurements to Commence in New York State continues to advance its bulk energy storage deployment efforts, and a final Bulk Storage Implementation Plan is now likely to be made public before the end of ENERGY STORAGE PROJECTS Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, New York PSC adopts energy storage road map detailing path to Hochul announced plans in January to double New York's previous energy storage goal of 3 GW by . The state released a draft road map in December New York PSC Approves NYSERDA's Billion-Dollar Bulk Energy Storage The PSC's prior Order Establishing Updated Energy Storage Goals and Deployment Policy 4 required NYSERDA to issue its first competitive solicitation for bulk Battery Energy Storage Systems: Main Considerations for Safe This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems (challenges & fires), BESS
