

Higher solar panel prices

U.S. prices are higher mainly due to tariffs. The average in the United States is projected to be 33.7 cents per watt in the second quarter, up from 30.8 cents per watt in the first quarter, according to Wood Mackenzie. The prices are for double-sided "TOPCon" panels. Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in . That price effectively drops to \$19,873 after considering the full federal solar tax credit. How much do solar panels cost on average? As of , the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends A worker checks solar panels before packaging at a production facility in the Gansu province of China on April 16, .
