

Italian lead carbon portable energy storage power supply

The US online giant wants 'carbon-free' operations by and has invested an unspecified amount in Energy Dome as well as identifying a pipeline of global sites for the company's long-duration energy storage (LDES) 'carbon batteries.' Silicon Valley search engine giant Google is set to accelerate Italian long-duration energy storage company Energy Dome, which has developed a storage technology that uses CO₂ to store electricity, has landed an important new backer, with global tech giant Google committing to invest in the company and support the deployment of commercial projects around the world. As global electricity demand surges--driven by AI expansion and cloud services--Google has taken a strategic step into long-duration energy storage (LDES), partnering with Italian firm Energy Dome to scale its CO₂-based storage technology across key international markets. The move marks the tech giant's first foray into long-duration energy storage. The new long duration energy storage system from Energy Dome uses CO₂ to store excess wind and solar energy for up to 24 hours. Support CleanTechnica's work through a Substack subscription or on Stripe. Carbon dioxide reaches a liquid state when compressed and it expands with a pop when released. Innovative long duration energy storage company Energy Dome plans to build its first CO₂-based thermo-mechanical energy storage plant in Sardinia, Italy, later this year. The Milan-based start-up, which was recently named 'European & Israel company of the year' in the Cleantech100 awards for 2023, has secured backing from Glennmont Partners from Nuveen and Exus Renewables have announced a collaborative effort to co-develop approximately 800MW of battery storage projects in southern Italy. Under this agreement, each company will spearhead the development of a portfolio comprising around 400MW of projects. The Google partners with Italy's Energy Dome on zero Italian energy storage firm Energy Dome said on Friday it had entered a commercial partnership with Google to supply carbon-free energy to the grids that power the operations of the U.S. Italian carbon battery company Energy Dome. Silicon Valley search engine giant Google is set to accelerate the global adoption of Energy Dome's carbon dioxide (CO₂) battery technology after investing in the Italian business and signing a deal. Google backs Italian long duration CO₂ energy storage technology. Google's partnership with Energy Dome is its first with a long duration energy storage company and technology and will see the two companies develop CO₂ Battery. Google Backs CO₂ Battery Storage in Global Push. While solar and wind provide variable input, long-duration energy storage remains a missing link in the company's clean energy strategy. Energy Dome's "CO₂ Battery" offers a thermal-mechanical energy storage solution. Carbon Dioxide Put To Work For Long Duration Energy Storage. Carbon dioxide reaches a liquid state when compressed and it expands with a pop when released, and now the Italian startup Energy Dome is ready to harness the action for a World's first CO₂ thermal energy storage battery. Innovative long duration energy storage company Energy Dome plans to build its first CO₂-based thermo-mechanical energy storage plant in Sardinia, Italy, later this year. Glennmont Partners, Exus Renewables, battery storage projects, Glennmont Partners and Exus Renewables announce a landmark collaboration to co-develop around 800MW of battery storage projects in southern Italy, bolstering the region's Energy Storage Technology Companies in Italy: Pioneering a New Era. As Europe pushes toward net-zero
