

## Latest on Spain's new power storage policy

What is energy storage in Spain? It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms. What does the European Commission say about energy storage in Spain? La Moncloa, 17/03/. European Commission approves new 700 million aid scheme to boost energy storage in Spain [News] The Ministry of Ecological Transition and Demographic Challenge will promote the large-scale deployment of this technology by co-financing investments of up to 85%. How will Spain increase its energy storage capacity? Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems. Will Spain be able to deploy large-scale electricity storage? The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal. Why should Spain invest in energy storage? Investing in energy storage helps Spain meet its climate goals. This includes achieving carbon neutrality by . Storing renewable energy instead of wasting it helps the country rely less on fossil fuels. This also cuts down greenhouse gas emissions. Pumped hydro, thermal storage, and battery systems are effective technologies. What is the European Commission's new energy storage support scheme? The European Commission approved a new support scheme. It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The Spanish government approved Royal Decree 7/ on June 24, resolving several long-standing obstacles hindering the secure and lawful deployment of energy storage projects. This move responds to the large-scale blackout incident experienced by the country in April this year. The Spanish government approved Royal Decree 7/ on June 24, resolving several long-standing obstacles hindering the secure and lawful deployment of energy storage projects. This move responds to the large-scale blackout incident experienced by the country in April this year. Spain's Council of Ministers has approved a royal decree to promote energy storage, accelerate electrification, and tighten oversight of the national grid, says the Ministry for the Ecological Transition and Demographic Challenge (MITECO). From ESS News Spain's Council of Ministers has approved a

This week, the Council of Ministers approved a new royal decree designed to strengthen grid resilience, promote energy storage, and streamline regulatory procedures for renewable and hybrid projects. The legislation, which integrates key elements of the earlier "Anti-Blackout Decree" (Royal The Spanish government has approved a royal decree aimed at strengthening the power grid's resilience, robustness and stability in response to the nationwide blackout in April. Some of the measures passed in this latest royal decree were picked up from the previous one in June, which was ultimately The new regulation, which integrates several measures from the so-called "Anti-Blackout Decree," aims to promote energy storage, modernize infrastructure, and accelerate
