

## Middle East Solar Panel Project

Bahrain-based Foulath Holding has signed an Power Purchase Agreement (PPA) with Dubai-headquartered Yellow Door Energy to develop a 123-megawatt-peak (MWp) solar power project, which will include the world's largest single-site rooftop solar plant. Bahrain-based industrial giant Foulath Holding has partnered with Yellow Door Energy, a leading sustainable energy developer in the Middle East and Africa, to launch a record-breaking 123 megawatt-peak (MWp) solar project. The project marks the construction of the world's largest single-site Bahrain's Foulath Holding, an industrial group specialising in steel and iron, has announced its agreement with Yellow Door Energy, the leading sustainable energy developer in the Middle East and Africa, to begin developing a major 123-megawatt solar power project. Developed under a power purchase A power purchase agreement is in place for a 123 MW solar project in Bahrain that will span 14 sites including the world's largest rooftop solar installation, a 50 MW system on top of a 262,000 m<sup>2</sup> stockyard shed. Steel-based investment company Foulath Holding and Dubai-based developer Yellow Door The UAE breaks ground on the world's largest solar and bess project, first of its kind. Moreover, it will be capable of delivering round-the-clock baseload renewable energy. Masdar in collaboration with EWEC (Emirates Water and Electricity Company) is developing the \$6 billion project. Moreover, it The project will include ten rooftop solar PV plants and four ground-mounted PV installations. The project aims to slash the equivalent of 90,000t of carbon emissions in its first year.
