

Japanese utility Electric Power Development Co Ltd (TYO:), or J-POWER, announced today it has signed a virtual power purchase agreement (VPPA) with telecommunications operator KDDI Corp (TYO:) that will support the construction of a 51.5-MW onshore wind farm. Japanese utility Electric Power Development Co Ltd (TYO:), or J-POWER, announced today it has signed a virtual power purchase agreement (VPPA) with telecommunications operator KDDI Corp (TYO:) that will support the construction of a 51.5-MW onshore wind farm. Kaminokuni No. 2 wind power Electric Power Development Co Ltd (J-POWER), Japan has signed a virtual power purchase agreement (VPPA) with telecommunications company KDDI Corp. The agreement will support the construction of a 51.5-megawatt (MW) onshore wind farm in Kaminokuni-cho, Hokkaido. The project will have 12 wind On March 31, , KDDI Corporation (headquartered in Chiyoda-ku, Tokyo; President, Representative Director and CEO: Makoto Takahashi; "KDDI"), Electric Power Development Co., Ltd. (headquartered in Chuo-ku, Tokyo; President and CEO: Hitoshi Kanno; "J-POWER"), and J-POWER Group company J-Wind KDDI Corporation and J-POWER Group have entered another virtual power purchase agreement (PPA) for onshore wind power generation following the earlier deal for the New Minami Osumi Wind Farm. In a statement, J-POWER said the latest agreement involves its wind power business JWind Kaminokuni, Ltd. Japan's growing wind power sector illustrates its efforts to embrace cleaner energy, though there remains significant room for expansion. As of today, Japan has an installed wind power capacity of approximately 4.2 GW, a small fraction of the country's potential. Studies estimate that Japan could A wind power plant in Hokkaido (Asahi Shimbun file photo) Reconstruction of aging wind power plants will soon have the wind at its back, as the Environment Ministry plans to simplify part of the environmental impact assessment procedures to speed the process. Currently, the same procedures are Japanese telecom KDDI helps build 50-MW wind farm with VPPA It is considered to be the largest virtual PPA for an onshore wind park in Japan's telecommunications industry and is expected to help KDDI reduce carbon dioxide (CO₂) Japan Expands RE with New Wind and Solar ProjectsThe project will have 12 wind turbines and is expected to start operations in September . KDDI plans to use the wind power to reduce carbon dioxide (CO₂) emissions from its telecommunication's base stations. KDDI and J-Power Signed Virtual PPA for a Second Onshore The J-POWER Group's extensive construction know-how, combined with the expectation of stable revenue from this PPA with KDDI, led to the decision to proceed with the construction of KDDI and J-POWER ink deal for second onshore In a statement, J-POWER said the latest agreement involves its wind power business JWind Kaminokuni, Ltd., KDDI, and Electric Power Development Co., Ltd. This is the largest virtual PPA for an onshore wind Wind Power in Japan: A Growing Opportunity for Japan's journey towards wind power adoption is a testament to the challenges and opportunities faced by countries transitioning to renewable energy. While progress has been made, further efforts are As Japan makes major investments in wind power, Japan's efforts to ramp up offshore wind power, in particular, are part of a larger international effort to embrace the energy source. At a meeting in Hiroshima last May,

The latest news on wind power in Japan's communication base stations

Group of Seven Ministry to fast-track rebuilding of older onshore Ministry officials expect that proposed changes will accelerate replacement of onshore wind power plants that were built around and later and are coming up for renewal. Wind is expected J-Power signs wind VPPA with Japanese telecoms The new wind power facility is expected to come into operation in December and it will feature five wind turbines, each with a capacity of 4.3 MW.
